Subject Index

Acrylamide-maleic anhydride copolymers, thermal behaviours 495
Activated carbon, low-temperature regeneration 339
Activation energy, of acid hydrolysis of D-glucose and cellulose 57
– –, of complexes 30
– –, of decomposition of styrene copolymers containing metal acrylates 349
– –, of mixed-ligand hexamine chromium(III) complexes 372
– –, of oxidation, of vanadium polysulphides 1136
– –, of precipitation processes of Al-Ag alloys 183
– –, for γ-relation of polycarbonate and polyester carbonate 157
– –, of solid-phase ligand substitution reactions 325
– –, of solid-state reaction of alumina-strontium carbonate mixture 133
– –, of thermal decomposition of Cr(III) thiocyanide complexes with organic bases 547
– –, – –, of Cu(II) pentacoordinated aquo complexes 207
– –, – –, of peroxides 843
– –, – –, of salts of pyridine-2-carboxylic acid 356
– –, – dehydration bis-salicylatodiaquo complexes 175
Adsorption study, modified derivatograph for 1116
Adsorption, of water on silica 1288
Aging of oxycellulose, thermal study of 1013
– – of polyurethane elastomer 1325
Aliphatic diesters, proximity effect in, calorimetric study of 1393
Alloys, surface oxides on, evolved gas analysis of 1071
8-Alkyltheophylline derivatives, thermal and spectral studies of 771
Alumina-strontium carbonate mixture, reaction, study by TG 129
Aluminium-silver alloys, precipitation processes in 177
– – zinc alloys, formation of Guinier-Preston zones in 671
Amine complexes, solid-phase ligand substitution reactions in 319
Ammonium nitrate, crystal transformations of 65
– uranates, thermal decomposition 107
Animals, study by calorimetry 1403
Aromatic amines, oxydation, study by thermometry 951

Barium zirconate ceramics, electrical and structural properties 1035
Bauxite, determination of mineral composition 137
Bibliography section 263, 503, 713, 965, 1173
Binary eutectic systems, role of a non-negligible vapour pressure 429
– mixtures of α-picoline and iso-aliphatic alcohols, thermodynamic properties of 441
Binding agent, montmorillonite as, in foundry practice, DTA 457

John Wiley & Sons, Limited, Chichester
Akadémiai Kiadó, Budapest

Biologically active ligands in complexes, thermal decomposition 25
Biomass production, of Serratia marcescens, calorimetric study of 1400
Bis-salicylato-diaquo complexes, dehydration 167
Bis-(sulphosalicylato)-diaquo complexes, thermal behaviour 305
Book review, 709, 997
Borate crystals, formation in glasses 793
Borohydride anion, solid-phase ligand substitution reactions by 319
Brochantite, synthetic, thermal decomposition of 603

Cadmium selenide films, for solar cells 753
Calcium alloys, study by DSC 1228
– hydrogen phosphate, DTA and microwave DTA of 45
– sulphate containing material, thermal behaviour up to 1550° 297
– –, thermal decomposition 299
– –, – – in carbon monoxide 187
Calorimeter, for small animals 1403
Calorimetric study, of high molecular polyethylene oxide films 551
– –, of magnetic transitions in alloys 1293
– –, of proximity effect in aliphatic diesters 1393
Calorimetry, for determination of excess enthalpy 1387, 1393
–, for recognition of enantiometric peptides 1367
Carbon monoxide, interaction with calcium sulphate 192
Carrageenan, kappa, conformational transition of 1375
Catalyst, for ethylene oxidation, temperature programmed reduction of 1267
Catalysts, changes during use in an industrial reactor 73
–, interaction on supported Ru and Cu with reduction 611
–, for methane reforming by steam, thermal study of 73
–, supported Ru and Cu, reduction of 611
Cellulose, acid hydrolysis of, in DSC 49
Ceramics, $BaZrO_3$, electrical and structural properties of 1035
Chalcopyrite, phase transition to sphalerite 383
Chemical process analysis, thermokinetics in 627
Chitin ammonophosphate complexes, thermal decomposition of 889
Chloro complexes of vanadium(IV) with trioctylamine and trioctylmethylammonium chloride, thermal decomposition of 97
2-Chloronaphtalene-2-hydroxynaphtalene system, phase diagram 215
Chlorowax, as fire retardant coating component, effect on wood 471
Chromium(III) thiocyanide complexes with organic bases, thermal behaviour 541
Coal, gasification of, in steam, study by thermal analysis 597
Cobalt(III)-oxidehydroxide, thermal behaviour of 391
Combustion of a fire retardant coating 467
Compensation effect, related to isoparametric correlations, theory 237
Complexes, of 6-amino-5-nitrosouracil derivatives, thermal behaviour of 377
–, with biologically active ligands, thermal decomposition of 25
–, of chloronickel(II), polymeric structure of 913
– of Co(II), Ni(II), Co(II), with 3-picolylamine, thermal decomposition of 579
–, of 5-nitrosopyrimidine derivatives, thermal decomposition of 921
–, pentacoordinated aqua, of Cu(II), thermal decomposition of 207
–, of urea with magnesium salts, thermal stability of 1047

Conformational transition, of kappa-carrageenan 1375
Congruent melting of platinum(II) complex with DMSO 1141
Convergent-thermal-wave technique for thermal analysis 33
Conversion of C_V to C_p, for linear macromolecules 229
Copolymers, cross linked, of vinyl acetate, thermal degradation of 943
Copper(II) complexes, of 3- and 4-pyridinealdoxime, thermal studies 1309
– –, transition from hexacoordinated structures 1381
– pentacoordinated aqua complexes, thermal decomposition of 207
– sulfate pentahydrate, dehydration of, calculation of kinetics by the single point method 570
– – –, infrared microthermography 1151
Coulometry, constant-current, coupling with thermometric titrimetry 5
Correction term of Kissinger parameters 657
Correlation analysis, restriction of the simplest use of, for solution of kinetic problems 831
Creep compliance, measurement by TMA 1001
Crystallization kinetics of glasses, determination by DTA 1223
– of polyoxyethylene-water system 1027
Cure degree, correlation with glass transition, with epoxy polymers 1343
– process of thermosetting resins, quality control of 1349
– reactions of unsaturated polyester resin 1359

Decarboxylation of salts of pyridine-2-carboxylic acid 353
Decomposition of cellulose by sulfuric acid, DSC 49
Dehydration of bauxites 139
–, of bis-salicylatodiaquo complexes 167
–, calculation of kinetics, by the single point method 570
–, of rare earth pyromucates 866
–, of salts of pyridine-2-carboxylic acid 353
Dehydroxylation, of different types of silica 1287
Dental amalgam, DSC curves of 704
Derivative thermogravimetry, of acrylamide-maleic anhydrid copolymers 496
– –, of 8-alkyltheophylline derivatives 773
– –, of bis-salicylato-diaquo complexes 170
– –, of bis sulphosalicylato-diaquo complexes 308
– –, of calcium sulphate in carbon monoxide 189
– –, – – up to 1550° 300
– –, of chloronickel(II) complexes with pyridine N-oxide 914
– –, of chromium(III) thiocyanide complexes with organic bases 544
– –, of complexes of 5-nitrosopyrimidine derivatives 924
– –, of halo-bis (piperidyldithiocarbamates) 402
– –, of heavy lanthanide 3-hydroxybenzoates 333
– –, of iron oxyhydroxides 823
– –, of mercury(II) 6-amino-5-nitrosouracil complexes 379
– –, of mixed-ligand hexamine chromium(III) complexes 369
– –, of lithium oxomolybdenum(VI) oxalate 148
– –, of lithium stearate 589
– –, of phosphonates 872
– –, of plaster up to 1550° 299
– –, of rare earth pyromucates 864
– –, of salts of pyridine-2-carboxylic acid 354

– –, of sodium lanthanide malonates 620
– –, of styrene copolymers containing metal acrylates 347
– –, of trinuclear μ-oxoacetates 1095
– –, of urea complexes of mangesium salts 1048
Differential scanning calorimetry, of acid hydrolysis of cellulose 52
– – –, of aging of polyurethane elastomers 1327
– – –, of ammonium nitrate 69
– – –, of 8-alkyltheophylline derivatives 775
– – –, of calcium alloys 1228
– – –, of 2-chloronaphtalene-2-hydroxynaphtalene system 217
– – –, of complexes of 5-nitrosopyrimidine derivatives 925
– – –, of dental amalgams 704
– – –, of diphenylamine-benzophenone mixture 1279
– – –, of fire retardant coatings 474
– – –, of heat transfer oils 766
– – –, of 5-n-heptyl-2(4-cyanophenyl)-pyrimidine 1280
– – –, of high molecular polyethylene oxide films 553
– – –, of iron-aluminium alloys 1233
– – –, of isotactic polypropylene 1333, 1340
– – –, of lithium stearate 589
– – –, of mercury(II) 6-amino-5-nitroso complexes 380
– – –, of metallic glasses 1262
– – –, method for differentiating first and second-order-transition in liquid crystals 61
– – –, of models of nematogenic polymers 1323
– – –, of modified zeolite catalysts 1255
– – –, of $NaNO_3$-KNO_3 mixture 1277
– – –, of natural rubber 934
– – –, of peroxides in the absence of solvents 841
– – –, of polyoxyethylene-water system 1029
– – –, for purity determination, comparative analysis of 901
– – –, for quality control of thermosetting resins 1353
– – –, of silicas 1285
– – –, simultaneous with thermomicroscopy, for phase diagram study 1273
– – –, study of crystallization of amorphous alloys with 1236
– – –, – of cure reaction of unsaturated polyester resin 1362
– – –, use of summation technique for evaluation 1169
– – –, of vanadium hydrogen phosphate 1243
Differential thermal analysis, of Al-Ag alloys 179
– – –, of ammonium nitrate 69
– – –, – uranates 111
– – –, of bauxites 140
– – –, of bis-salicylato-diaquo complexes 170
– – –, of bis (sulphosalicylato) diaquo complexes 308
– – –, of calcium sulphate in carbon monoxide 189
– – –, of catalyst for methane reforming during use in idustrial reactor 78
– – –, of chitin ammonophosphates 891
– – –, of chloro complexes of vanadium(IV) 99
– – –, of chloronickel(II) complexes with pyridine N-oxide 914
– – –, of chromium(III) amine complexes with borohydride anions 322
– – –, – thiocyanide complexes with organic bases 544

– – –, of copper(II) pyridinealdoxime complex 1313
– – –, – sulfate pentahydrate, calculation of dehydration kinetics 570
– – –, for determination of adsorption and desorption 1118
– – –, – of crystallization kinetics of glasses 1223
– – –, – melting enthalpies 809
– – –, of glasses of controlled porosity 796
– – –, of halo-bis (piperidyldithiocarbamates) 402
– – –, of heat transfer oils 767
– – –, of heavy lanthanide 3-hydroxybenzoates 333
– – –, of hydroxylammonium neodymium sulfate dihydrate 492
– – –, of iron oxyhydroxides 823
– – –, of lithium oxomolybdenum(VI) oxalate 148
– – –, of mixed-ligand hexamine chromium(III) complexes 369
– – –, with microwaves 44
– – –, of montmorillonite binding agents 459
– – –, of NdAs, at constant specific volume 1086
– – –, of nickel(II) 1,2-propanediamine complexes 450
– – –, one-cell, theory of 781
– – –, of 3-picolylamine complexes 581
– – –, of plaster up to 1550° 299
– – –, of platinum(II) complex with DMSO 1144
– – –, real and hypothetical base line of 786
– – –, of rare earth pyromucates 846
– – –, of salts of pyridine-2-carboxylic acid 354
– – –, of sodium bis-oxalatodiaquothallate(III) monohydrate 537
– – –, – lanthanide malonates 620
– – –, of solid-liquid equilibrium of naphtalene derivatives with nitroaromatics 195
– – –, of styrene copolymers containing metal acrylates 347
– – –, synthesis of the Borchardt-Daniels and the Kissinger methods 557
– – –, of synthetic brochantite 605
– – –, of trinuclear μ-oxoacetates 1095
– – –, of urea complexes of magnesium salts 1048
– – –, of uranyl carboxylates 85
– – –, of vanadium polysulphides 1130
– – –, of V_2O_5-Ag_2O mixtures 882
Dimanganese cyclotetraphosphate, thermal preparation of 159
Diphenylamine-benzophenone mixture, phase diagram of 1278
Disperse material, DTA, role of gas phase in 849
Dithiocarbamates, kinetics by quasi-isothermal method 399
Electric properties, of CdSe films for solar cells 753
Electrochemically catalysed reaction, study of thermal effect of 12
Electrode reaction, thermal effect of, determination 11
Electronic spectra, of chloronickel(II) complexes 916
– –, of nickel(II) 1,2-peropanediamine complexes 451
– –, of 3-picolylamine complexes 583
Enantiometric peptides, recognition by calorimetry of 1367
Energies of crystal transformations, of ammonium nitrate 68
Energy profiles of solid-phase ligand substitution 365
Enthalpimetric titration, of oxydation of aromatic amines 957

Enthalpy change of conformational transition of kappa carrageenan 1378
–, excess, of n-alkanals in binary mixtures 1387
– of formation, of CoOOH and CoOOD 395
– of relaxation of metallic glasses 1263
– of thermal decomposition of peroxides 843
Entropy change of phase transition of chalcopyrite to sphalerite 387
– of formation, of Cu(II) and Zu(II) complexes with polydentate ligands 1384
– of selenium 895
Epoxy conversion of novalac resin, by DSC 1353
– polymers, glass transition/cure degree correlation of 1343
Eutectic binary systems, description by *T-V-x* diagram 429
Excess enthalpies, of n-alkanals in binary mixtures 1387
– –, of l-chlorohexane in binary mixtures with aliphatic diesters 1395
Evolved gas analysis, study of surface oxides by 1071

Finite element approach to heat flow analysis 1063
Fire retardant coating, study by thermal analysis 467
Flammability of polyisoprene vulcanizates 1105
Flash pyrolysis studies of fire retardant coating 475

Gasification of coal, in steam, study by thermal analysis 597
Glass, metallic, relaxation and crystallization of 1259
Glass transition temperature, of epoxy polymers 1343
– – –, of natural rubber 929
Glasses, of controlled porosity, thermal treatment of 793
–, crystallization kinetics of, determination by DTA 1223
Glucose, acid hydrolysis of, by DSC 52
Gradient theory, mathematical description of thermal curves 649
Greases, related to lithium stearate, thermal properties of 587
Growth, microcalorimetric study of, of Serratia marcescens 1397
Guinier-Preston zone formation in alloys 671
Gypsum, microwave DTA of 45
–, thermal behaviour up to 1550° 299
–, – decomposition in carbon monoxide 187

Hardening effect, of La alloying on Gd 1296
Heat of adsorption, of water on silica 1287
– capacity function, of Schottky 1210
– –, of linear macromolecules, conversion of C_V to C_p 229
– – measurements, of two-phase polymers 1217
– –, of solid solutions of Gd La alloys 1293
– of crystallization of metallic glasses 1265
– of dilution, of enantiometric peptides 1370
– flow analysis, a new finite element approach to 1063
– of hydrolysis, of cellulose, by DSC 52
– of phase transformation, role of gas phase 849
– production of hamster, measured by calorimetry 1409
– transfer oils, thermal stabilities of 763
– of wetting of silica acid, by thermometry 488

Heavy lanthanide 3-hydroxybenzoates, thermal decompoisition of 331
Hexamine chromium(III) complexes, with mixed ligands, solid-phase ligand substitution in 365
High-temperature thermomagnetic analysis, for solid state reactions 121
Hydroxylammonium neodymium sulfate dihydrate, thermal decomposition of 491

Infrared microthermography, for study of single crystals U150
Infrared spectra, of bis(sulphosalicylato)-diaquo complexes 309
– –, of catalyst for methane reforming during use in industrial reactor 81
– –, of chloronickel(II) complexes 916
– –, of copper(II) pyridinealdoxime complex 1311
– –, of hydroxylammonium neodymium sulfate dihydrate 492
– –, of iron oxyhydroxides 816
– –, of mixed-ligand hexamine chromium(III) complexes 368
– –, of nickel(II) 1,2-propanediamine complexes 450
– –, of residues of thermal decomposition of vanadium(IV) chloro complexes 102
– –, of silica samples 1289
– –, of sodium bis-oxalatodiaquothallate(III) monohydrate 538
– –, of sodium lanthanide malonates 621
– –, of synthetic brochantite 606
– –, of thermal decomposition products of ammonium uranates 115
– –, – – –, of lithium oxomolybdenum(VI) oxalate 147
Intermetallic compounds, thermodynamic stability of 1301
Iron oxyhydroxides, detection of impurities in 813
Isoparametric correlations, for analysis of solid-phase reactions 677
– kinetics for chemical transformations, theory 237
Isotactic polypropylene, crystalline structure and melting of 1331, 1337

Kappa-carrageenan, conformational transition of 1375
Kinetic applications of thermal analysis 869
– compensation effect, in solid-phase reactions 677
– parameters, of thermal degradation of acrylamide-maleic anhydride compolymers 500
– –, – – of trinuclear μ-oxoacetates 1095
Kinetics, applicability of Kissinger equation for 657
–, calculated by the single point method 557
– of cure reaction, of unsaturated polyester resin 1364
–, of decomposition of styrene copolymers containing metal acrylates 349
–, –, of silver carbonate 22
– of dehydration, of uranyl carboxylate compounds 83
– of precipitation processes in Al-Ag alloys 177
–, of thermal dehydration of bis-salicylato-diaquo complexes 167
–, – –, of halo-bis(piperidyldithiocarbamates) 399
–, – –, of lithium stearate and related greases 593
–, – – of methylpyridinium octamolybdates 1126
–, – desorption of *o*-NO_2-phenol from activated carbon 339
Kissinger-equation, general applicability of 657

Lanthanide sesquisulfides, Schottky heat-capacity contributions on 1212
Laser thermal analysis, in situ, of bulk materials 33
Lead germanate, phase transition of 1169

Linear macromolecules, heat capacity of 1217
Liquid crystals, DSC method for differentiating first and second-order transitions in 61
Lithium oxomolybdenum(VI) oxalate, thermal decomposition of 145
– stearate and 12-OH stearate, thermal properties of 587
Low-metling organic compounds, melting enthalpies of 803

Macromolecule, linear, calculation of heat capacity 229
Magnesium monophosphate-urea complex, thermal stability of 1047
– nitrate-urea complex, thermal stability of 1047
– oxide, and -spinel, formation in zeolite catalyst 1256
Magnetic transition, of Gd, calorimetry of 1293
Malonates, sodium lanthanide, thermal decomposition of 619
Mathematical description of thermal curves 649
– statistics, applied to nonisothermal kinetics 831
Melting curves, theoretical and recorder, comparison of 904
Mercury(II) 6-amino-5-nitrosouracil complexes, thermal behaviour of 377
Mesophasic properties, of polycarbonate analogues 1317
Metallic glass, relaxation and crystallization of 1259
Metallo-organic compuounds, solid-state thermal decomposition of 353
Metallurgical problems, quantitative calorimetric treatment of 1227
Methylpyridinium octamolybdates, thermal decomposition of 1121
Microcalorimetric study, of growth of Serratia marcescens 1397
Microscopic DSC, cell for 1274
Microwave DTA 44
– techniques for thermodilatometry 46
Microwaves in thermal analysis 43
Mixed ligand complexes, solid-phase ligand substitution processes in 365
Montmorillonite binding agents, study of structures by DTA 457
Mordenite, $[Pd(NH_3)_4]$-from, thermal decomposition of 641

Naphtalene, derivatives of, solid-liquid equilibrium with nitroaromatics 195
Nematogenic polycarbonates, analogues of, mesophasic properties of 1317
Neodymium arsenid-arsenic system, phase diagram of 1081
Network structure of cis 1,4-polyisoprene, effect on flammability of 1105
Nickel(II) complexes, stoichiometry of thermal decomposition 913
– 1,2-propanediamine complexes, thermal behaviour of 447
Nitroaromatics, solid-liquid equilibrium with naphtalene derivatives 195
5-Nitrosopyrimidine derivatives, thermal decompoisition of 921
Nonisothermal kinetics, applied of mathematical statistics to 831

Octamolybdates, methylpyridinium derivatives of, thermal decomposition of 1121
Octylcyanobiphenyl, first order and second-order transitions of, by DSC 63
One-cell DTA, theory of 781
Oxidation of vanadium polysulphides, kinetics of 1129
Oxycellulose, thermal study of aging of 1013
Oxygen index method, flammability study of polyisoprene by 1105

Parallel plate rheometry, of thermoplastic materials 1001
Peroxides, thermal decomposition, in the absence of solvents 841

Peptides, enantiometric, recognition by calorimetry 1367
Phase diagram, of 2-chloronaphtalene-2-hydroxynaphtalene system 222
– –, of diphenylamine-benzophenone mixture 1278
– –, of 5-n-heptyl-2(4-cyanophenyl)-pyrimidine 1280
– –, of models of nematogenic polymers 1320
– –, of $NaNO_3$-KNO_3 mixture 1277
– –, of NdAs–As system, at constant specific volume 1084
– –, study by simultaneous thermomicroscopy/DSC 1273
– –, of V_2O_5-Ag_2O system 879
– rule, with description of eutectic equilibrium 429
– transition, chalcopyrite to sphalerite, entropy change of 383
– –, of lead germanate 1169
– –, in liquid crystals, differentiation by DSC of 61
Phyenyl isocyanate-n-butanol, reaction of, application of thermokinetics in 627
Phosphonates, kinetics of thermal decomposition of 872
Photochemical reactions, followed by TG 17
3-Picolylamine complexes, preparation and characterization of 579
α-Picoline-iso-aliphatic alcohol mixtures, thermodynamic properties of 441
Plaster, thermal behaviour up to 1550° 299
Platinum(II) complex, with DMSO, formation and thermal decomposition 1141
Polycarbonate, dynamic mechanical thermal analysis of 153
Polyester carbonate, dynamic mechanical thermal analysis 153
– resin, unsaturated, cure reaction of 1359
Polyethylene oxide film, study of melting behaviour by DSC 551
Polyheteroarylenes, thermal decomposition of 1053
Polyisoprene vulcanizates, flammability of 1105
Polymers, calculation of heat capacity of 234
Polypropylene, isotactic, crystalline structure and melting of 1331, 1337
Polyoxyethylene-water system, crystallization of 1027
Polystyrene, creep compliance of, by TMA 1008
Polysulphides of vanadium, oxidation of 1129
Polyurethane elastomer, aging of 1325
Porous glasses, thermal analysis of 793
Precipitation processes in Al-Ag alloys 177
1,2-Propanediamine complexes of Ni(II), thermal behaviour of 447
Proximity effect in aliphatic diesters, calorimetric study of 1393
Purity determination methods, comparative analysis of 901
Pyridinealdoxime, complex with Cu(II), thermal studies of 1309
Pyridine-2-carboxylic acid salts, solid-state thermal decomposition of 353
– N-oxide, complexes with chloronickel(II), thermal decomposition 913
Pyromucates, rare earth, thermal decomposition of 861
Pyrolysis gas chromatography, of vinyl acetate copolymers 947

Q-derivatograph, for determination of melting enthalpies 808
Quantitative calorimetry, for study of metallurgical problems 1227
– thermal analysis, mathematical description of thermal curves 649
– – –, role of gas phase in 849

Quartz, surface hydration of 1283
Quasi-isothermal TG, of halo-(bispiperidyldithiocarbamates) 416

γ-Radiation, effect on $BaZrO_3$ ceramics 1035
Raman spectra, of iron oxyhydroxides 820
Rare earth metals, intermetallic compounds of, thermodynamic stability of 1302
– – pyromucates, thermal decomposition of 861
Reaction of phenyl isocyanate and *n*-butanol 627
Recrystallization of isotactic polypropylene 1337
Reduction, temperature-programmed, of Ru and Cu on supports 611
Regression analysis, restriction of the simplest use of, for solution of kinetic problems 831
Reinecke salt derivatives, thermal behaviour of 541
Rubber, glass transition temperature, determination of 929

Schottky contribution, in chemical thermodynamics 1209
Selenium, entropy of 895
Silica, surface hydration of 1283
Silicic acid, determination by thermometry 479
– –, heat of wetting of, determination by thermometry 488
Silver carbonate, thermal and photochemical decomposition of 21
– catalyst, study of deactivation by thermal analysis 1267
Sodium bis-oxalatodiaquothallate(III) monohydrate, preparation, characterization of 535
Solar cells, temperature dependence of electric properties of 753
Solid-liquid equilibrium, DTA, for napthtalene derivatives with nitroaromatics 195
– – phase ligand substitution reactions in amine complexes 319, 365
– – reactions, isoparametric correlations for analysis of 677
– – transition of Ni(II) 1,2-propanediamine complexes 447
– – reaction, of alumina-strontium carbonate mixture, by TG 129
– – –, study with thermomagnetic analysis 124
– – thermal decomposition of metallo-organic compounds 353
Specific heat of metallic glasses 1264
Summation technique for evaluation of DSC results 1169
Surface oxides on alloys, evolved gas analysis of 1071
– properties, of different types of silica 1283

Temperature programmed desoprtion on vanadium-phosphorus catalyst 1248
– – reduction, combined with evolved gas analysis 1073
– – –, of Ru and Cu on supports 611
– – –, of silver catalyst 1267
Tetrachloroaurates, of 8-alkyltheophylline derivatives, thermal studies 771
Theory of calculation of kinetic constants by the single point method 557
– of isoparametric kinetic relations for chemical transformations 237
Thermal analysis, for detection of impurities in iron oxyhydroxides 813
– –, with laser technique of bulk materials 33
– –, use of microwaves in 43
– behaviour of acrylamide-maleic anhydride copolymers 495
– –, of bis(sulphosalicilato)-diaquo complexes 305
– –, of Co(III) oxidehydroxide 391
– –, of mercury(II) 6-amino-5-nitrosouracil complexes 377

– –, of 1,2-propanediamine complexes of Ni(II) 447
– –, of transition metal acrylate-styrene copolymers 345
– decomposition of ammonium uranates 107
– –, of calcium sulphate 299
– –, – – in carbon monoxide 187
– –, of chitin ammonophosphate complexes 889
– –, of chloronickel(II) complexes 913
– –, of Cu(II) pentacoordinated complexes 207
– –, of halobis(piperidyldithiocarbamates) 399
– –, of heavy lanthanide 3-hydroxybenzoates 331
– –, of hydroxylammonium neodymium sulfate dihydtate 491
– – kinetics, isothermal and dynamic methods for 869
– –, of 5-nitrosopyrimidine derivatives 921
– –, of ξ-$[Pd(NH_3)_4]$-form of mordenite 641
– –, of platinum(II) complex with DMSO 1141
– –, of 3-picolylamine complexes 579
– –, of polyheteroarylenes 1053
– –, of rare earth pyromucates 861
– –, of sodium lanthanide malonates 619
– –, of synthetic brochantite 603
– –, of trinuclear μ-oxoacetates 1095
– degradation of oxycellulose 1013
– preparation of dimanganese cyclotetraphosphate 159
– profiles, measured by infrared microthermography 1161
– stabilities of heat transfer oils 763
– –, of urea complexes of magnesium salts 1047
Thermodesorption, of o-NO_2-phenol, from activated carbon 339
Thermodilatometry of PVC, with microwave technique 46
Thermodynamic properties of α-picoline-iso-aliphatic alcohol mixtures 441
– stability, of intermetallic compounds 1301
Thermogravimetry, of acrylamide-maleic anhydride copolymers 496
–, of 8-alkyltheophylline derivatives 773
–, of ammonium uranates 108
– preparation of dimanganese cyclotetraphosphate 159
–, of bis(sulphosalicylato)-diaquo complexes 308
–, of calcium sulphate up to 1550° 300
–, – – in carbon monoxide 189
–, of chitin ammonophosphates 891
–, of chloro complexes of vanadium(IV) 99
–, of chloronickel(II) complexes with pyridine N-oxide 914
–, of chromium(III) thiocyanide complexes with organic bases 544
–, of complexes with biologically active ligands 27
–, – of 5-nitrosopyrimidine derivatives 924
–, of copolymers of vinyl acetate 946
–, of copper(II) pyridinealdoxime complex 1312
–, for determination of adsorption and desoprtion 1118
–, of fire retardant coatings 472
–, following photochemical reactions by 17
–, of halo-bis(piperidyldithiocarbamates) 402

–, of heavy lanthanide 3-hydroxybenzates 333
–, of hydroxylammonium neodymium sulfate dihydrate 492
–, of iron oxyhydroxides 823
–, of lithium oxomolybdenum(VI) oxalate 148
–, – stearate 589
–, of manganese dihydrogen diphosphate 160
–, of mercury(II) 6-amino-5-nitrosouracil complexes 379
–, of mixed-ligand hexamine chromium(III) complexes 369
–, of mixture of alumina and strontium carbonate 129
–, of montmorillonite binding agents 464
–, of nickel(II) 1,2-propanediamine complexes 450
–, of $[Pd(NH_3)_3]$-form of mordenite 644
–, of physophonates 872
–, of 3-picolylamine complexes 581
–, of plaster up to 1550° 299
–, of platinum(II) complex with DMSO 1144
–, of polyheteroarylenes 1058
–, of porous glasses 799
–, quasi-isothermal, of Co(III) oxidehydroxide 391
–, of rare earth pyromucates 864
–, of salts of pyridine-2-carboxylic acid 354
–, of sodium bis-oxalatodiaquothallate(III) monohydtate 537
–, – lanthanide malonates 620
– study of gasification of coal 599
–, of styrene copolymers containing metal acrylates 347
–, of synthetic brochantite 605
–, of Trinuclear μ-oxoacetates 1095
–, of urea complexes of magnesium salts 1048
–, of uranyl carboxylates 85
–, of vanadium hydrogen phosphate 1243
–, – polysulphides 1130
Thermokinetics, application in chemical process analysis 627
Thermomagnetic analysis, coupled with TG for kinetic studies 124
– –, high-temperature, for solid state reactions 121
Thermomechanical analysis, of thermoplastic material 1001
Thermometric titrimetry, coupling with constant-current coulometry 5
Thermometry, determination of moisture in silicic acid and silicates by 479
–, – of SiO_2 and Al_2O_3 by 479
–, for study of mechanism of oxydation 951
Thermomicroscopy/DSC, application to study of phase diagram 1273
Thermosetting resins, quality control of the cure process of 1349
Toner, creep compliance measurements of 1008
Transformation front, motion of, as model of thermoanalytical cell 649
Transition metal acrylate-styrene copolymers, thermal behaviour of 345
Trinuclear μ-oxoacetates, thermal decomposition of 1095
Two-phase polymers, heat capacity of 1218

Uranyl carboxylate compounds, dehydration, kinetics 83
Urea complexes, of magnesium salts, thermal stability of 1047

Vanadium(IV) oxidation and catalytic property 1247
Vanadium pentoxide-silver(I) oxide system, phase diagram of 879
– polysulphides, oxidation, kinetics of 1129
– phosphorus oxides, structure and reactivity of 1241
– pyrophosphate, formation by dehydration 1243
Vapour pressure, role in description of eutectic binary systems 429
Vinyl acetate, cross-linked copolymers of, thermal degradation 943
Vitamin C, thermometric titration of 7

Water vapour, effect on aging of polyurethane elastomer 1325
– –, measurement of adsoprtion and desoprtion of 1115
Wood, fire retardant coating for 467

X-ray diffraction, of bauxites 141
– –, of $BaZrO_3$ ceramics 1038
– –, of CdSe film 755
– –, of chitin ammonophosphates 893
– –, of isotactic polypropylene 1333
– –, of residues of thermal decomposition of vanadium(IV) complexes 104
– –, of sodium bis-oxalatodiaquothallate(III) monohydrate 537
– –, of synthetic brochantite 605
– –, of thermal decomposition products of ammonium uranates 114
– –, of vanadium hydrogen phosphates 1243

Zeolite catalyst, modified with Mg, DSC 1253
Zinc(II) complexes, transition from hexacoordinated structures 1381
